Welcome to our 2023 – 2024 catalogue, which is packed full of innovative new ranges and exciting products to inspire your customers. At Artis we work very closely with our global brand partners, to ensure that we offer the most comprehensive range of on trend products, selected for their individual design and manufactured to meet the exacting standards of hospitality professionals. With over 70 years' experience as one of the largest suppliers of Glassware, Barware, Tableware and Cutlery to the food service industry, Artis takes enormous pride in the fact we put our customers' needs and expectations first and foremost. All products are available through our extensive network of national and regional distributors throughout the UK and the Republic of Ireland and are supported by Artis's dedicated field based team of specialist sales consultants, to assist in servicing your requirements.

A premium collection of classic and modern shapes with a pure bone china white lustre brings pure elegance and a timeless appeal to the tabletop. A refined and delicate profile and high levels of strength and durability make it the ideal solution for professional long term use.

*See following page for full contact details

Noble China – Refined, Alumina Strengthened Vitrified Porcelain

Ultra Smooth High Fired Glaze

The exceptionally high firing temperature of over 1,400c delivers an exceptionally hard, strong and ultra smooth glaze which is resistant to abrasion. This results in a surface which is easy to clean and does not suffer from permanent marking, therefore, showing your food off to perfection. The extended life delivers excellent cost in use.

Bone China White Vitrified Porcelain

Purity is fired in the kiln to over 1,400c making it extremely dense, very strong and resistant to the ingress of water and thus a very hygienic surface on which to serve food. The firing temperature and profile delivers a fully vitrified porcelain which complies with the performance requirements of BS4034 Vitrified Hotelware.

Alumina Strengthened

Purity includes the addition of Alumina which helps enhance the bone china white lustre and conveys exceptional strength and durability. This helps to achieve excellent cost in use on a refined, thinner profile for the perfect fine dining experience.

Designed for Performance

Purity has been design engineered with performance and functionality in mind to withstand the rigours of a busy commercial environment. Rounded, strong edge profiles prevent chipping and the stackability of key shapes aids space saving and back of house storage, resulting in less breakages.

Optimum Heat Retention

The dense nature of the Purity body which is created through the firing process and vitrification means the product will hold on to heat for longer periods of time, therefore, keeping food and drink at an optimum temperature during food service.

Dishwasher, Oven, Microwave and Freezer Safe

Purity has been designed and developed to be highly resistant to the detergents and chemicals used in industrial dishwashers. The very high temperature firing makes all of our products oven safe to the maximum temperature of a commercial oven, however, to prolong the life of your product we do not recommend a very extreme/abrupt temperature change of greater than +/- 220K.

Shaped by Responsibility

Quality assurance is a major factor in the production of Purity products and this is reflected through the commitment to increase the yields of finished products and thus reduce the raw material consumption. Autonomous, highly efficient energy production generates electricity and heat. Enhanced environmental performance is achieved for our customers through our environmental programmes and we are certified to International Environmental Management Systems ISO 14001 and Energy Management ISO 50001.

5 Year Edge Chip Warranty and 3 Year Limited Glaze Abrasion Warranty

The performance of the product and glaze is outstanding and has been designed to withstand the demands of busy commercial kitchens and restaurants.

***For full details please use the following email: chip.glazewarranty@artis-uk.com to request a warranty registration form and a copy of the warranty conditions.**

Not Applicable to Playground products, or for Hire Companies.

The Gallery

A premium collection of exquisitely decorated contemporary plates and bowls provide the perfect canvas for your culinary masterpieces.

A myriad of designs cleverly combine texture and colour to enhance and showcase the natural beauty of the food.

Bespoke Branding and Decoration

Bespoke branding and decoration gives you the opportunity to create a professional and personalised look for your business. We specialise in providing individual made to order items in your own design or one created especially

for you by our team of design experts. From a simple one colour logo to a full colour design we will work with you to create your own personalised tableware on our Purity and Bauscher products.

Contact us for further details at:
sales@artis-uk.com
 020 8391 5544

Minimum order quantity – Low minimum order quantities of only 300 Purity/Bauscher pieces whether it is a logo or an all over decoration allows small businesses such as independent cafés through to large restaurants and hotels chains to enhance their brand. Re order quantity 96 pieces.

Lead Time – Approximately 6 - 8 weeks from both approval of fired sample and receipt of the order. Please ask for current lead times at the start of the process. Our team of experts will support you through all stages of the journey to achieve your personalised tableware.

Inglaze decoration – The inglaze colour pigments are fired to high temperatures of 1,200c which sink into the glaze becoming one surface which is exceptionally hardwearing and scratch resistant. The colours will remain permanently bright and will not fade over time even after extensive use in a commercial dishwasher.

Please note this service is not available on Playground products.

Bauscher – Creative Solutions

**SHAPED BY
RESPONSIBILITY**
ISO 14001 + ISO 50001
CERTIFIED

A high-performance professional tableware collection offering creative solutions with an everlasting appeal. Products which are strong and functional, yet aesthetically appealing make them a very popular long-term choice for all types of hospitality service.

*See following page for full contact details

Professional Vitrified Porcelain

Ultra Smooth High Fired Glaze

The exceptionally high firing temperature of over 1,400c delivers an exceptionally hard, strong and ultra smooth glaze which, is resistant to abrasion. This results in a surface which is easy to clean and does not suffer from permanent marking, therefore, showing your food off to perfection. The extended life delivers excellent cost in use.

Super Vitrified Porcelain

Bauscher is fired in the kiln to over 1,400c making it extremely dense, very strong and resistant to the ingress of water and thus a very hygienic surface on which to serve food. The firing temperature and profile delivers a fully vitrified porcelain which complies with the performance requirements of BS4034 Vitrified Hotelware.

Quality Raw Materials

The product uses the best raw materials and a sophisticated composition including kaolin, quartz and feldspar. This creates a highly appealing durable porcelain with an exceptionally strong and smooth glaze and bright white finish providing a cost effective long term solution.

Designed for Performance

Bauscher has been design engineered with performance and functionality in mind to withstand the rigours of a busy commercial environment. Rounded, strong edge profiles prevent chipping and the stackability of key shapes, aids space saving and back of house storage resulting in less breakages.

Optimum Heat Retention

The dense nature of the Bauscher body which is created through the firing process and vitrification means the product will hold on to heat for longer periods of time, therefore, keeping food and drink at an optimum temperature during food service.

Dishwasher, Oven, Microwave and Freezer Safe

Bauscher has been designed and developed to be highly resistant to the detergents and chemicals used in industrial dishwashers. The very high temperature firing makes all of our products oven safe to the maximum temperature of a commercial oven, however, to prolong the life of your product we do not recommend a very extreme/abrupt temperature change of greater than +/- 220K.

Shaped by Responsibility

Quality assurance is a major factor in the production of Bauscher products and this is reflected through the commitment to increase the yields of finished products and thus reduce the raw material consumption. Autonomous, highly efficient energy production generates electricity and heat. Enhanced environmental performance is achieved for our customers through our environmental programmes and we are certified to International Environmental Management Systems ISO 14001 and Energy Management ISO 50001.

5 Year Edge Chip Warranty and 3 Year Limited Glaze Abrasion Warranty

The performance of the product and glaze is outstanding and has been designed to withstand the demands of busy commercial kitchens and restaurants.

***For full details please use the following email: chip.glazewarranty@artis-uk.com to request a warranty registration form and a copy of the warranty conditions.**

Not applicable to Playground products, or for Hire Companies.

NEW

Scope – Linea

The power of simplicity, Scope Linea is a combination of simple, casual shapes and a subtle linear textured embossment in a pure white glaze.

Playground – Beyond Taste

Bring an air of playfulness and fun back to the dining experience. Playground is a collection of contemporary stoneware in a range of innovative shapes combining striking glaze finishes with texture and colour to appeal to the latest gastronomic trends in food presentation.

PLAYGROUND

Contemporary Stoneware

Playground is a collection of rustic stoneware products of the highest quality offering elegant tableware concepts that meet the requirements of today's customers.

The collection takes on board the mix and match principle so popular in the modern dining experience and has designed products to mix with our porcelain brands to create striking combinations.

Tapping in to the multi sensory experience through the use of bold shapes combined with multiple textures, striking glazes and depths of colour to create a mood and an emotional response to dining.

Our collection ReNew is an innovative product made from 90% recycled ceramic material to deliver the latest in eco-responsible ranges.

All of our Stoneware products are dishwasher safe, heat resistant and suitable for a microwave.

The full collection of Playground combines multiple material combinations such as glass, wood, stainless steel, stone and marble and can be viewed on our Artis website or by contacting us for further details at: sales@artis-uk.com
Tel: 020 8391 5544

NEW

Coast & Country

A stoneware collection in a stunning matt black glaze with a 'cast iron' look and a 'griddle effect' embossment across the centre of the items.

Each flatware piece is slightly different offering endless combinations for presentation and bowls with an interlocking feature for stability and ease of service.

Cosy Mug

Cosy Mug a modern and classic design of tough, tempered glassware for the bar and table.

All Durablex products are tempered glass, making them extremely durable and resistant to breakage and thermal shock, resisting temperatures of up to 130°C – this means that all items can be used for hot beverages.

Mini Terrine jars must be fully disassembled before Dishwash

Thermic Glass

Made from double walled Borosilicate glass and designed in Italy with a passion for food.

- The double walled construction – Frames the food providing high visibility and keeps hot and cold food at the optimum temperature for longer
- Very light weight and strong blown glass – Durable enough to work in the foodservice environment
- Thermal shock resistant – Ideal for serving hot and cold food
- Microwave and Dishwasher Safe – Flexible use in the commercial kitchen
- Double handled dishes for easy positioning and handling

Chafers Features

- Brake mechanism means roll top covers stay open at any angle required.
- Removable covers for easy cleaning.
- Steam holes in lids prevent condensation; water is channelled into water pan preventing unsightly run-off.
- Fuel burners, or electric heating elements may be used on all roll-top chafers.
- Integral wind block facilitates outdoor use of fuel burners.

Lock-Eat® *Luigi Bormioli*
ITALY

The Lock-Eat glassware food and juice Jars have a glass lid that can be completely removed making them ideal for table service, compact in size and easy to wash in a dishwasher.

Designed to present table serving solutions in a functional and innovative way. The food jars are perfect for single serving portions such as amuse bouche, appetisers, finger foods and desserts. The carafe style jars are ideal for all types of drinks including juices, smoothies and water.

The flexibility of the design means they can also be used for storing, preserving, canning and fermenting due to the superior airtight properties of the glass lid.

Innovative detachable lids

Features and Benefits

- **Fully detachable glass lid and clamp** – Easy to fill, easy to present with food in, easy to open and close and easy to wash.
- **Glass allows for full visibility of food and drink** – Ideal for all types of table service from breakfast through to dinner.
- **Smaller sizes** – Ideal for single serving portions
- **Food jars are stackable** – Space saving storage.
- **Durable glassware** – Can be reused over and over again and fully recyclable.
- **Airtight closure** – Prevents food bacteria. Suitable for storing, canning, preserving and fermenting.
- **Dishwasher and Freezer safe.**

CrushGrind®

Stockholm, represents Scandinavian design traditions with its simplicity, minimalism and functionality. Each is clearly marked with S for Salt and P for pepper on the top. Stockholm has the CrushGrind® EasyFill feature, simply pull the stopper upwards and then you have a funnel shaped entrance for filling the spice. With easy adjustment to allow you to set the coarseness of your grind. Available in oak and walnut.

Stockholm, Oak and Walnut are available with the all FLIPPABLE S/P INDICATOR so that any mill can contain either Salt or Pepper and can easily be differentiated.

FIRST IN FOOD SERVICE

Luxury design enhancing the sensory pleasure of food

A luxury cutlery brand offering highly polished and beautifully finished pieces combined with a heavier weight, adding to their lavish style and feel. The thickness and weight allows for the depth of sculpted shapes to be forged out of the finest of raw materials from Finland and Japan.

The sensory experience of dining out is enhanced by the luxurious feel, good balance and mirror finish of the cutlery designs. The pleasure of sharing food and remembering these experiences is enhanced through the objects we hold and use in our everyday lives.

With over 50 years of manufacturing experience in creating the finest quality flatware, WNK has grown to become a major international supplier to the food service industry.

Gauge Range

Features and Benefits

- Quality Stainless Steel 18/10 – Highly durable and stain resistant.
- Heavier weight cutlery – Allows for lavish design forged deep into the metal, well balanced and beautiful to hold.
- Highly polished mirror finish – High end luxury with a smooth and reflective surface.
- Extensive range of designs – Offering a complete choice for the customer.
- In house design and stylist team - Varied choice of cutlery designs and continued product development.
- Dishwasher safe – In commercial dishwashers without rusting or staining.

Portofino Stonewashed

Canada

The art of precision, beauty and balance

The Salvinelli brand offering stunning Italian design and manufacturing in Italy. It successfully combines both traditional craftsmanship and new advances in technology and engineering.

A family business with over 50 years experience in manufacturing cutlery based in the historic town of Brescia in Northern Italy.

The result is a wide selection of refined and elegant cutlery ranges to suit different styles and tastes. Designed specifically for the hotel and restaurant market.

Backed by a guarantee of quality, due to the use of the very best raw materials and the constant quality controls carried throughout the production process.

Features and Benefits

- Stainless Steel 18/10 – Highly durable and stain resistant
- Perfect combination of weight & design – A well balanced piece which is easy to hold
- Highly polished mirror finish – Premium look with a smooth and strong surface
- Comprehensive set of buffet serving utensils – Covering all food service needs
- Elegant & simple Italian design – To serve food with style.
- Experts in cutlery design and manufacture – Delivering performance in the food service market
- Dishwasher Safe – In commercial dishwashers without rusting or staining

Grand Hotel Buffet 18/10

Bespoke Branding and Finishes

Bespoke branding and innovative finishes give you the opportunity to create a professional and personalised look for your business.

We offer 'made to order' laser marking with a company name or logo.

We also specialise in providing 'made to order' items in various colours and finishes to suit your specific requirements.

Available across all of our Salvinelli ranges of 18/10 cutlery.

Contact us for further details at:

gedwards@artis-uk.com

Laser Marking

PVD Coating

Ice Satin Effect

Stonewashed

Laser Marking – Enhance your brand

- We offer a unique customisation across all items of 18/10 cutlery.
- Initials, names, symbols and logos, approximately 20 x 10mm can be produced.
- The laser marking can be applied to the standard mirror finish, PVD colour coated and stonewashed finishes.
- Fully dishwasher safe.
- Please note that the Ice finish is not suitable for this process.
- MOQ is 300 assorted pieces.

PVD Coating – A touch of originality

- A range of striking metallic colours are available in our specialist PVD coating which is both durable and striking.
- Available in 4 colour finishes Gold, Copper, Champagne and Gunmetal Black.
- Dishwasher safe ***Please see our 'PVD care in use' guide on our website for more information.**
- This process can be combined with Laser Marking, Ice and Stonewash to create innovative double finishes.
- MOQ is 300 assorted pieces.

ICE Satin Effect – Personalise your look

- The ICE effect creates a smooth and seamless look with contemporary edge.
- A durable finish due to the micro peening process making it fully dishwasher safe.
- The advantage of the satin finish is that you will not see any finger marks.
- Can be combined with PVD coating to create a double effect.
- Not suitable for Laser Marking.
- MOQ is 300 assorted pieces.

Stonewashed – Unique vintage style

- The cutlery is tumbled to create a textured vintage look to the cutlery.
- A durable finish which is fully dishwasher safe.
- Can be combined with Laser Marking and PVD coating to create a double effect.
- MOQ is 300 assorted pieces.

Features and Benefits

HIGH TEMP
RESISTANT

REAL
WOOD

IMPACT
RESISTANT

DISHWASHER
SAFE

5 YEAR
GUARANTEE

- Polywood handles are made by impregnating polymer into real wood. This process gives the handles a resistance to water ensuring they retain their pristine condition.
- Performance blades made from the highest quality stainless steel - For exceptional durability and superior cutting edge technology.
- Sculpted ergonomic handles - Easy and comfortable to hold.
- Impact resistant handles with distinctive stainless steel rivets - Guaranteeing safety and security as well as adding character.
- Dishwasher-safe Polywood means no hand washing - Hot water and detergent resistant.
- Five year guarantee - Against manufacturing defects of Polywood handles.

• The blades are made of high-performance steel (AISI 420), which is characterised by its premium quality.

• Three stainless steel rivets guarantee a safe fixation of handle and blade and emphasise the distinctive look of the handle.

• Polywood handles are totally dishwasher safe.

• The extra sharp, tough cutting edge ensures superior cutting properties.

High-Tech Lead Free Crystal Glass for professional use

Lead Free Crystal glassmakers specialising in the production of elegant, ultra clear glassware, perfect for the professional market.

With a strong commitment to innovation utilising traditional Italian craftsmanship and new-age glassmaking technology to create beautiful glassware of the very highest quality.

Luigi Bormioli is committed to using the most sustainable and environmentally friendly methods of production.

TITANIUM Reinforced®

A patented anti abrasion treatment on glass stems using titanium to reinforce it permanently.

It increases the stem's resistant to breakages by 140%, even through multiple dishwasher cycles and helps maintains transparency and sparkle.

Enhanced Stem Technology to Permanently Increase the Resistance to Breakage.

Features and Benefits

- Resistance of the rim – Offering additional overall strength

- Resistance to impact – High resistance to breakage and less chipping

- Resistance to twisting of stems – Whilst washing and drying of product

- Dishwasher safe - Transparency and brilliance over 4000 industrial washing cycles

- Ultra Clear transparency – Offering the most outstanding clarity

- Resistance to Mechanical Shock – increased by 30%

- Dishwasher safe - Transparency and brilliance over 2000 industrial washing cycles

Wine Connoisseurs

For a sommelier selecting a wine that enhances the consumers dining experience is of the upmost importance. When you match this wine menu with the appropriate glasses, it will further delight your customers experiences.

Our Wine Connoisseurs collection from Luigi Bormioli offers a wide range of professional wine glasses that are the result of research, sensory analysis and scientific studies carried out on various shapes, size, innovative materials and treatments. This culminates in a collection of beautiful pieces that will appeal to the tastes of even the most discerning enthusiasts.

Expertly crafted from SON.hyx crystal, this eclectic range of glassware combines contemporary style with traditional principles. A complete range of high precision glassware dedicated to both wine tasting and the professional foodservice environment. All items have been designed to enhance the wine aroma, to adjust the wine taste and to appreciate the real wine colour with all its nuances.

The different shapes of the body:

- Facilitate the swirling of the wine in the stem glass.
- Improve the balance of the different aromas in the head space.
- Convey the aromatic molecules to the nose (with the right concentration and balance).
- Guide the wine towards specific areas of the tongue ensuring the appropriate amount of wine at every sip.
- Guarantee the perfect contact between the lower lip and the rim of the bowl, avoiding annoying drops on the mouth edge.
- The size of the head space was designed to deliver the best combination of the aromatic molecules allowing the taster to fully explore and enjoy the different aromatic notes during olfactory assessment.

High quality glassware made for the professional food service environments.

I Meravigliosi - The Wine Connoisseurs Choice

A simple and perfect shape that utilises a new production technology to reproduce artisan techniques and create this premium range of wine glasses.

- Super-light and balanced when tasting
- Robust and flexible
- The glasses transmit the quality and the intense aroma of the wine
- Designed to develop an excellent mouth feel by creating a perfect equilibrium amongst various components of flavour
- The glasses allow for a pleasant aftertaste
- The bowl's shape creates a unique decanter effect

Ultra thin rim - 0.95mm

Perfect glass distribution

The profile of the bowl ensures an aromatic flow as well as a non-turbulent flow of the wine

The bowl's flat base ensures a high aeration of the wine as it increases the headspace, thus reproducing a decanter effect

Thin stem (5mm)
Titanium reinforced

Flat and stable base

I Meravigliosi

I Meravigliosi - True Wine Aroma powered by the aromatic chamber and a flat base bowl. True Wine Flavour powered by the bowl profile and perfect rim. True Wine Colour powered by Son.hyx Crystal Glass and perfect glass distribution.

LA ROCHÈRE

1475

FRANCE

French Artisan Design – Creators of Glass Since 1475

La Rochère has made a name for itself since 1475 through its passion for innovation. The making of stylish and beautiful glassware thanks to products such as Abeille, a bee collection inspired by Napoleon's coat of arms.

Producing artisanal glass for more than 500 years, making it the oldest continuously running glass factory in Europe. The company is recognized around the world for designing and producing authentic, high quality glassware with a French style.

Beautiful 'handmade' style glassware with affordable prices which are all dishwasher and microwave safe.

Features and Benefits

- Each piece of La Rochère glassware is made of a very durable and clear glass and lead free
- All La Rochère glassware is dishwasher safe
- A variety of glassware pieces available, including champagne flutes, stemware, and goblets
- Abeille's collection contains an original mixture of clear and colour glass

LIBBEY®

Leading edge technology for exceptional glassware performance

For over 200 years Libbey has been an expert in producing glassware for professionals.

Offering a variety of glassware from functional stackable tumblers to elegant and lightweight wine glasses. Working closely with spirited foodservice professionals to produce distinctive showstoppers to fit the latest trends.

High quality, ultra durable glassware backed by trusted guarantees.

● Libbey Safedge Rim Guarantee

If the rim of any glass covered by the Safedge Rim Guarantee chips, Libbey will replace or refund the price of the glass. The product must have been purchased via Artis in the UK and returned, through your distributor, to Artis, to qualify for the Guarantee. Breakages are not covered by this Guarantee.

■ Libbey Safedge Rim and Foot Guarantee

If the rim or foot of any glass covered by the Safedge Rim and Foot Guarantee chips, Libbey will replace or refund the price of the glass. The product must have been purchased via Artis in the UK and returned, through your distributor, to Artis, to qualify for the Guarantee. Breakages are not covered by this Guarantee.

An additional heat treatment process targeted at the rim of the stemware and tumbler products. Increasing the resistance to thermal and mechanical shock resulting in a very strong glass with prolonged life in service.

Precision manufacturing produces a rim with a minimum bead delivering a more chip resistant edge and fine lip feel.

A special heating and rapid cooling process strengthens the upper portion of the glass increasing resistance to thermal and mechanical shock.

One piece stemware is the perfect balance of weight, functionality and aesthetics. It is inherently stronger than other stemware, formed from one piece of glass so there are no weak points.

Onis

NEW BRAND. SAME GLASS.

Onis, the new brand for Libbey designed product made in Europe.

The majority of Libbey products, available in the UK are currently made in Europe. During 2023, European manufactured product will gradually transition to the new Onis brand.

This will include Onis rebranded product and packaging.

To aid this transition all products have been dual coded in the catalogue.

- ✔ If the rim of any product covered by the Onis Rim Guarantee chips, LCG will replace or refund the price of the glass. The product must have been purchased via Artis in the UK and returned, through your distributor, to Artis, to qualify for the Guarantee. Breakages are not covered by this Guarantee.

WHAT SETS **Onis** APART

EXTRA
TOUGHENED

- ✗ An additional heat treatment process targeted at the rim of the stemware and tumbler products. Increasing the resistance to thermal and mechanical shock resulting in a very strong glass with prolonged life in service.

FINESSE LASER
CUT RIM

- ☀ An after process which results in a very fine polished rim offering the ultimate lip feel and pure taste experience.

STACKABLE

- ▼ Designed to achieve ultimate stackability delivering optimum space saving behind the bar and a longer life in service. The stacking ring feature supports the stack rather than the rim and helps prevent damage.

SENSORY
ENHANCER

- 🌀 Developed to maximise the aroma and flavour for an enhanced tasting experience.

1924 with a distinctive stem, embossed footplate and original bowl design that gracefully opens out to let your lips rest on the elegant rim, in turn enhancing the taste experience.

Elegance and lightness combined for hospitality

Royal Leerdam combines elegant design and functional detail in its extensive range of glassware. With a proud history spanning over 140 years, the brand is known for its attention to detail and exquisite design.

Elegant design contributes to a sense of quality and adds value to the overall image of the restaurant, hotel and bar. The brand has versatility with its wide range of shapes and lightness of weight.

Royal Leerdam has a long and successful history of designing and manufacturing glassware that will meet all the needs of the hospitality industry.

Features and Benefits

- Lightweight – The lightness of weight is particularly suited to tray service
- Finesse laser cut rim – Finely polished rim which enhances the drinking experience
- Enlarged footplate – Adds stability to the glass
- Safe and sustainable – Soda lime glass is free of cadmium and lead. It is a safe and sustainable material.
- Thin and tall stems – Elegant to hold
- Dishwasher & Microwave Safe – All items are suitable for use in a dishwasher and microwave

Bouquet – A broad range of shapes and sizes, perfect for casual wine-by-the-glass service.

The Tempered Glass Choice For Everyday Use

Since 1945, Durablex has pioneered tempered glass technology to produce the very highest quality, durable drinking glasses at their factory in La Chapelle-Saint-Mesmin, France.

Durablex were the first factory in the world to produce tempered glassware and thanks to continued investments and commitment to quality, Durablex has achieved its high standard of excellence which makes the brand successful throughout the world.

Suitable for fast moving, high volume outlets where strength, safety and durability are valued.

Tempered Glass

Thermal shock

Dishwasher safe

Microwave safe

Freezer safe

Features and Benefits

- Glass Tempering technology - Makes the glass extremely durable and improves its mechanical resistance
- Impact and chip resistant – Durablex tempered glass is 2.5 times stronger than ordinary glass
- Thermal Shock Resistant CSN EN 1183 - Durablex is manufactured to withstand sudden temperature extremes from -4°F to 212°F and is suitable for hot or cold liquids.
- Safety is a Priority - If broken, Durablex shatters into small pieces and not shards, reducing the risk of any potential injury

Empilable –
Modern, stylish
but tough glass
that stacks, for
easy storage.

Stacks of Space!

Stylish, practical, versatile and high quality is what you can expect from Artis Stackable glassware ranges.

- Space saving, stackable designs which aid safe storage and maximise the utilisation of space behind the bar.
- Each range has a multi stacking feature, which ensures glass collection and handling is safe and easy.
- Pint glasses are available in nucleated versions, where the regeneration of the bubbles gives the perfect serving.
- Stacking glassware available in a variety of designs and sizes, making them extremely versatile for all drink service environments.

Balloon Gin Glasses

The popularity of Gin cocktails continues to soar. The Spanish style large, balloon-shaped stemmed glass or the 'copa de balon' is perfect. Their shape and size allows a fuller appreciation of the flavours and aromas of any drink.

The Tulip Punchbowl, designed by Robert Schinkel and the winner of Libbey's Glassology design competition.

Punch dates back to the 1600's when British sailors travelling to the East and West created their own recipes with local spirits, mainly rum and spices and mixed them together in a bowl, known as a Punchbowl.

Robert's competition winning Punchbowl design was inspired by the tulip which was highly prized and very expensive in the 1600's.

Drinking Jam Jars are for Cold Beverages only. ● Libbey Safedge Rim Guarantee. ● Onis Rim Guarantee.

Beer

Nucleated Glass ◆

These glasses contain etched pattern at the bottom which provide a nucleation site for all the bubbles, helping to maintain the carbonation in your beer for longer.

This means that bubbles continuously rise up to the surface of the glass, carrying with them the aromas trapped inside your brew, and break straight to your nose. Thus, nucleated glassware provides a superior olfactory experience.

Flashback
Mixing Glass

Tiki culture is back to the cocktail scene. Best known for rum drinks, Tiki glasses are also perfect to recreate classic tequila based cocktails.

UK CA

Artis glassware ranges include products suitable for the serving of beers, wines and shots in compliance with current legislation on the sale of beer, wine and shots, by the glass:

- UKCA Marked Glassware is the replacement in the UK for the CE Mark which is no longer valid. The UKCA Marking came into effect on 1 January 2021
- **Wines by the glass** are most commonly permitted in 125ml, 175ml and 250ml measures. Wine glasses should be lined and UKCA marked.
- **Beers by the glass** are permitted as $\frac{1}{3}$ pt, $\frac{1}{2}$ pt, $\frac{2}{3}$ pt, 1pt and 2pt – please note that 3pt is not a permitted nominal capacity. UKCA ‘marked to brim’, or ‘marked to line’ glasses are permitted. Graduated measures are also possible – details upon request.
- **Jugs** are permitted as $\frac{1}{3}$ pt, $\frac{1}{2}$ pt, $\frac{2}{3}$ pt, 1pt, 2pt and 4pt (a 4pt jug can be calibrated at 3pt).
- **Shots by the glass** are most commonly permitted in 25ml, 35ml and 50ml measures.
- In most cases there is a charge per piece for lining and UKCA marking, for UKCA marking brim measures and Nucleation only.
- In this price list we have identified the most popular options in each range. If the glass you require is not listed with a UKCA Mark or Nucleation option, please contact our Sales Office on **020 8391 5544** and we will be pleased to advise you.
- We can also CE UKNI mark products for Customers in Northern Ireland.

GoldPlas® Wash and Store system, the cost effective solution for the caterer looking for a quality wash-rack that also offers safe and secure storage for products that are used intermittently, or that must be mobile in their location.

Measurement Guide for GoldPlas® Racks

- Always take the widest measurement it will not necessarily be the rim; check the bowl and foot.
- Allow free space around bowl for best wash results.
- When ordering for cups we recommend the use of tilted cup racks.

To determine the rack compartment size

- Place item upside down over circle chart.
- Whichever circle the largest diameter of the item fits within will determine the number of compartments and their size.

To determine the height of the rack

Up to 130mm high (h) 1 Extender
 130mm h would need 2 Extenders
 170mm h would need 3 Extenders
 215mm h would need 4 Extenders
 258mm h would need 5 Extenders

16 Compartment Cup Rack (10.9 x 10.9cm)

9 Compartment Cup Rack (14.8cm sq)

Measuring Tips:

Measure across the widest diameter of glass.

Measure across the full height of glass.

Exceptional resistance to industrial dishwashing detergents

Bowl impact testing

Stem impact testing

Technological Glossary

SON.hyx from Luigi Bormioli

Crystal glass from Luigi Bormioli has always been produced with the purest raw materials, without the use of lead and with advanced technology. This gives it a high level of transparency and brilliance.

Mechanical Properties

Glassware made with SON.hyx crystal has improved resistance to mechanical shocks. Laboratory tests have given the following results:

- Up to 37.5% increase in rim strength.
- Up to 105% increase in resistance to mechanical shocks.
- Up to 98% increase in resistance to breakage through twisting at the stem during hand cloth drying.

Chemical Properties

Tests have demonstrated that SON.hyx crystal glassware has an exceptional resistance to industrial dishwasher detergents and chemicals. After 4,000 wash cycles in commercial dishwashers SON.hyx crystal glassware retains all its original properties.

Sparkx from Luigi Bormioli

An innovative, technologically advanced ultra clear, durable glass with very low iron content for excellent transparency. 30% increased resistance to mechanical shocks.

Resistant to over 2000, industrial washing cycles. Lead and other heavy metals free. Tested by spectrophotometric measuring and classified as 'Ultraclear', according to ISO/PAS IWA 8:2009.

TITANIUM Reinforced®

Titanium Reinforced Stems

Permanent Anti-Abrasion Treatment on the Glass' Stems provides an enhanced hardness and resistance to abrasion and breakage.

Tempered Glass

All Durablex products are tempered glass, making them extremely durable and resistant to breakage and thermal shock, resisting temperatures of up to 130°C – this means that all items can be used for hot beverages.

Nucleated Glassware

These glasses contain “scratches” at the bottom which provide a nucleation site for all the bubbles, helping to maintain the carbonation in your beer or Sparkling wine for a much longer time.

This means that bubbles continuously rise up to the surface of the glass, carrying with them the aromas trapped inside your brew, and breaks olfactory experience.

Understanding Cutlery

Stainless Steel is, by definition, a metal alloy that contains iron, chromium and nickel, but that must contain in excess of 11% chromium. It is the chromium that provides high lustre and improved resistance to staining and corrosion; the nickel makes the alloy more malleable, enabling each piece to be finely crafted. The highest quality of stainless steel is known as 18/10, with the 18 referring to 18% chromium content, and the 10 referring to 10% nickel content in the steel; the higher these percentages, the higher the quality of stainless steel.

Our luxury ranges are 'hollow handled', available in 18/10 grade stainless steel; the hollow handled ranges epitomise the highest levels of finesse, high quality and artisan excellence.

Our superior steak/pizza knives are a cut above the rest - unlike traditional wooden, riveted handles, the technologically advanced 'Polywood' wooden handles are resin impregnated and therefore resistant to high temperatures, water and shock, making them the ideal practical choice for busy service environments; they carry a 5 year guarantee and are fully dishwasher safe, with no need for hand washing.

Cutlery Care Advice

The term 'stainless steel' suggests that items are completely resistant to tarnish or marking; however, even 18/10 grade stainless steel is not totally corrosion or stain-proof; contact with some chemicals, flame/direct heat and abrasion may trigger a degenerative process that can lead to etching, pitting and marking. You can prolong the lustre and high quality finish of your cutlery by following a few simple care guidelines:

- Store stainless steel and silver cutlery separately.
- Mineral salts from tap water may cause staining – please dry cutlery carefully after hand washing.
- To avoid staining by detergents please use a weak solution and ensure proper rinsing and drying.
- Chalky deposits may occur in hard water areas; please use a water softening device and ensure that you rinse cutlery on a dishwasher rinse programme, as some water softeners are regenerated with salt.
- Avoid direct contact with heat or flame, such as a hot plate or gas burner, or immersion in synthetic vinegar, as these may also cause staining. Most stains can be polished off with a proprietary polish.
- Give extra care to knives; to maintain a good cutting edge avoid standing knives in water overnight as this causes as much exposure to corrosion as 3 to 4 months of ordinary usage.

Century Line – Chefs knives

In order to maintain and prolong the life of your knives we recommend the following:

- Wash the knives by hand using warm water and a mild detergent, avoid using any abrasive products, dry immediately with a soft dry cloth.

- Use the knives only to cut food, always on a wooden board or plastic surface.
- Avoid cutting frozen food as this may damage the edge.

Professional Porcelain Care Advice

Artis supplies a wide range of professional porcelain products, to suit most tastes, qualities and budgetary requirements.

You can maintain the appearance and extend the life of your porcelain by following some simple guidelines:

- Avoid scraping off leftover food with cutlery, as metal can cause marking. Instead use a wooden or rubber scraper.
- Metal marking may occur if ceramics make contact with metal utensils, causing grey metal trace marks, due to some steel being softer than the ceramic glaze. Metal marking is easily removed with a gentle, non-abrasive household cleaning agent.
- Ensure that porcelain is washed within 50 minutes of leaving the table to avoid drying on.
- Pre-rinse porcelain before washing to loosen deposits and avoid baking on in the dishwasher.
- Stack plates and platters from above: do not slide them between other pieces when stacking. The bases of plates and platters may scratch decorated surfaces.
- Stack plates and platters from above: do not slide them between other pieces when stacking. The bases of plates and platters may scratch decorated surfaces.
- To avoid chipping use the appropriate warewashing rack – see our GoldPlas range.

- Use stock in rotation to and from the dishwasher, to ensure even wear and reduce excessive abrasion of some items.

Ceramic Care Advice

Please use all points raised for professional porcelain care, when caring for all your ceramic products.

Cerafume Unique thermic technology means that this product can go straight from the freezer to the oven, or hob without cracking. It is also scratch resistant and dishwasher proof.

Glassware Care Advice

Glass is by nature fragile - please see our Technological Glossary on page 318 for details of all the different kinds of thermal after-processes, partial tempering and heat treatments, designed to increase the resistance of glassware to thermal and mechanical shock and reduce breakages.

In addition, Artis supplies the iconic Duralux brand of tempered glassware; all Duralux products are tempered glass, making them extremely durable and resistant to breakage and thermal shock, resisting temperatures of up to 130°C – this means that all items can be used 'oven-to-table' or for hot beverages.

To minimise breakages and to prolong the longevity and appearance of your glassware, please follow some simple guidelines:

- Do not put cutlery into glasses.
- Never pick up glasses in clusters.

- Be careful to avoid contact with beer and water taps.
- Do not put cold liquids into hot or warm glasses straight from the dishwasher – this can cause cracks.
- Do not stack glasses that have not been designed to stack.
- We recommend storing non-stacking glasses in racks – see our GoldPlas warewashing range for suitable sizing to suit your glassware.
- Pre-heat glasses for hot drinks by running them under warm water. We recommend that you pour hot liquid over the back of a spoon into a glass.
- When handling glassware, avoid contact between glasses, to avoid scratching.
- Never scoop ice with a glass.
- Check glasses regularly for chips or cracks – if found, immediately dispose of that item safely.
- Most glassware can be cleaned in a dishwasher, however, always use a non-caustic detergent as caustic detergents affect head retention, etch the glass and give the glass a shadowy tinge.
- Always wash new glasses before use to remove manufacturing residues.
- Hot water on the premises should be stored at 60°C – if water is stored at a higher temperature, by the time it reaches the machine it may be too hot and could crack glasses, or bake-on debris.
- Coffee cups should never be washed with glassware as dregs can taint water, staining glasses – this also applies to drinks containing cream.

Polycarbonate Care Advice

Polycarbonate is a tough, transparent, virtually unbreakable thermoplastic. It is dishwasher safe up to 500 washes and can withstand temperatures of up to 145°C.

Plastic/Acrylic Care Advice

To maintain the clarity and transparency of acrylic/plastic products we recommend hand washing with a maximum temperature of 60°C.

Dishwasher cleaning agents and excessive heat causes acrylic plastic glassware to “craze”.

Bamboo/Wood Care Advice

- Bamboo and Wood are natural products, therefore, each piece will have slight differences.
- Clean all your bamboo products with a damp cloth and mild detergent; it is not recommended to put these items in the dishwasher.
